Schmiede '19

Jordi

improvCues came from a project developed at **Schmiede '19**

“a cooperative prototyping environment, focused on the arts, hacking and entrepreneurship”

"I have noticed that giving artists salt, stones and twigs can make them feel calm in the rough sea of life. Presenting shown on a television, I propose a project that attempts to find gender by looking at the audiences chest."

NOSTALGIA BOT

v4.1c

Trained on a limited set of old Schmiede projects, NostalgiaBot conjures up new ideas based on it's hazy memory of past success and won't listen to your new project ideas.

Please TYPE A NEW PROJECT IDEA to help train our AI bots:

All ideas welcome: old or new, simple or complex, restrained or wild. Hit return to submit your idea ... one of the bots will then reply above with a brand new idea of it's own.

These AI bots have been trained extensively on many Schmiede projects. You may recognise elements of your own project. Could this be the start of a new collaboration? How do you feel about an AI helping in your creative practice? Would you share creative credit with this bot? Is your human creativity threatened? ... have you been replaced by machine?

Schmiede Project Generator
by Jordi, Martin & Pete
Team Fossil, 2019

Project Idea Bot

I suggest a project constructed from industrial grade beamers, screens and some magic in such a way so that the audience feels exhilarated and fun. The project will develop upon the ideas started in previous Schmiede project "Paint Pendulum".

NOSTALGIA BOT

v4.1c

Trained on a limited set of old Schmiede projects, NostalgiaBot conjures up new ideas based on it's hazy memory of past success and won't listen to your new project ideas.

Please TYPE A NEW PROJECT IDEA to help train our AI bots:

All ideas welcome: old or new, simple or complex, restrained or wild. Hit return to submit your idea ... one of the bots will then reply above with a brand new idea of it's own.

These AI bots have been trained extensively on many Schmiede projects. You may recognise elements of your own project. Could this be the start of a new collaboration? How do you feel about an AI helping in your creative practice? Would you share creative credit with this bot? Is your human creativity threatened? ... have you been replaced by the machine?

Schmiede Project Generator
by Jordi, Martin & Pete
Team Feral, 2019

we interviewed many of the artists to form a database of ideas

then used this corpus of ideas to generate new ideas using markov chains

"An artwork exploring digital terrorism through the beauty of ice based poetry."

SMITH BOT

v8.2a

This is the most advanced bot and generates projects based on an extensive memory of past projects.

Please TYPE A NEW PROJECT IDEA to help train our AI bots:

All ideas welcome: old or new, simple or complex, restrained or wild. Hit return to submit your idea ... one of the bots will then reply above with a brand new idea of it's own.

These AI bots have been trained extensively on many Schmiede projects. You may recognise elements of your own project. Could this be the start of a new collaboration? How do you feel about an AI helping in your creative practice? Would you share creative credit with this bot? Is your human creativity threatened? ... have you been replaced by the machine?

Schmiede Project Generator
by Jordi, Martin & Pete
Team Feral, 2019

"Making art in the river."

FORGETFUL BOT

v2.3b

This bot has a short term memory (probably from drinking too many €1 beers) and only remembers the last few ideas.

Please TYPE A NEW PROJECT IDEA to help train our AI bots:

All ideas welcome: old or new, simple or complex, restrained or wild. Hit return to submit your idea ... one of the bots will then reply above with a brand new idea of it's own.

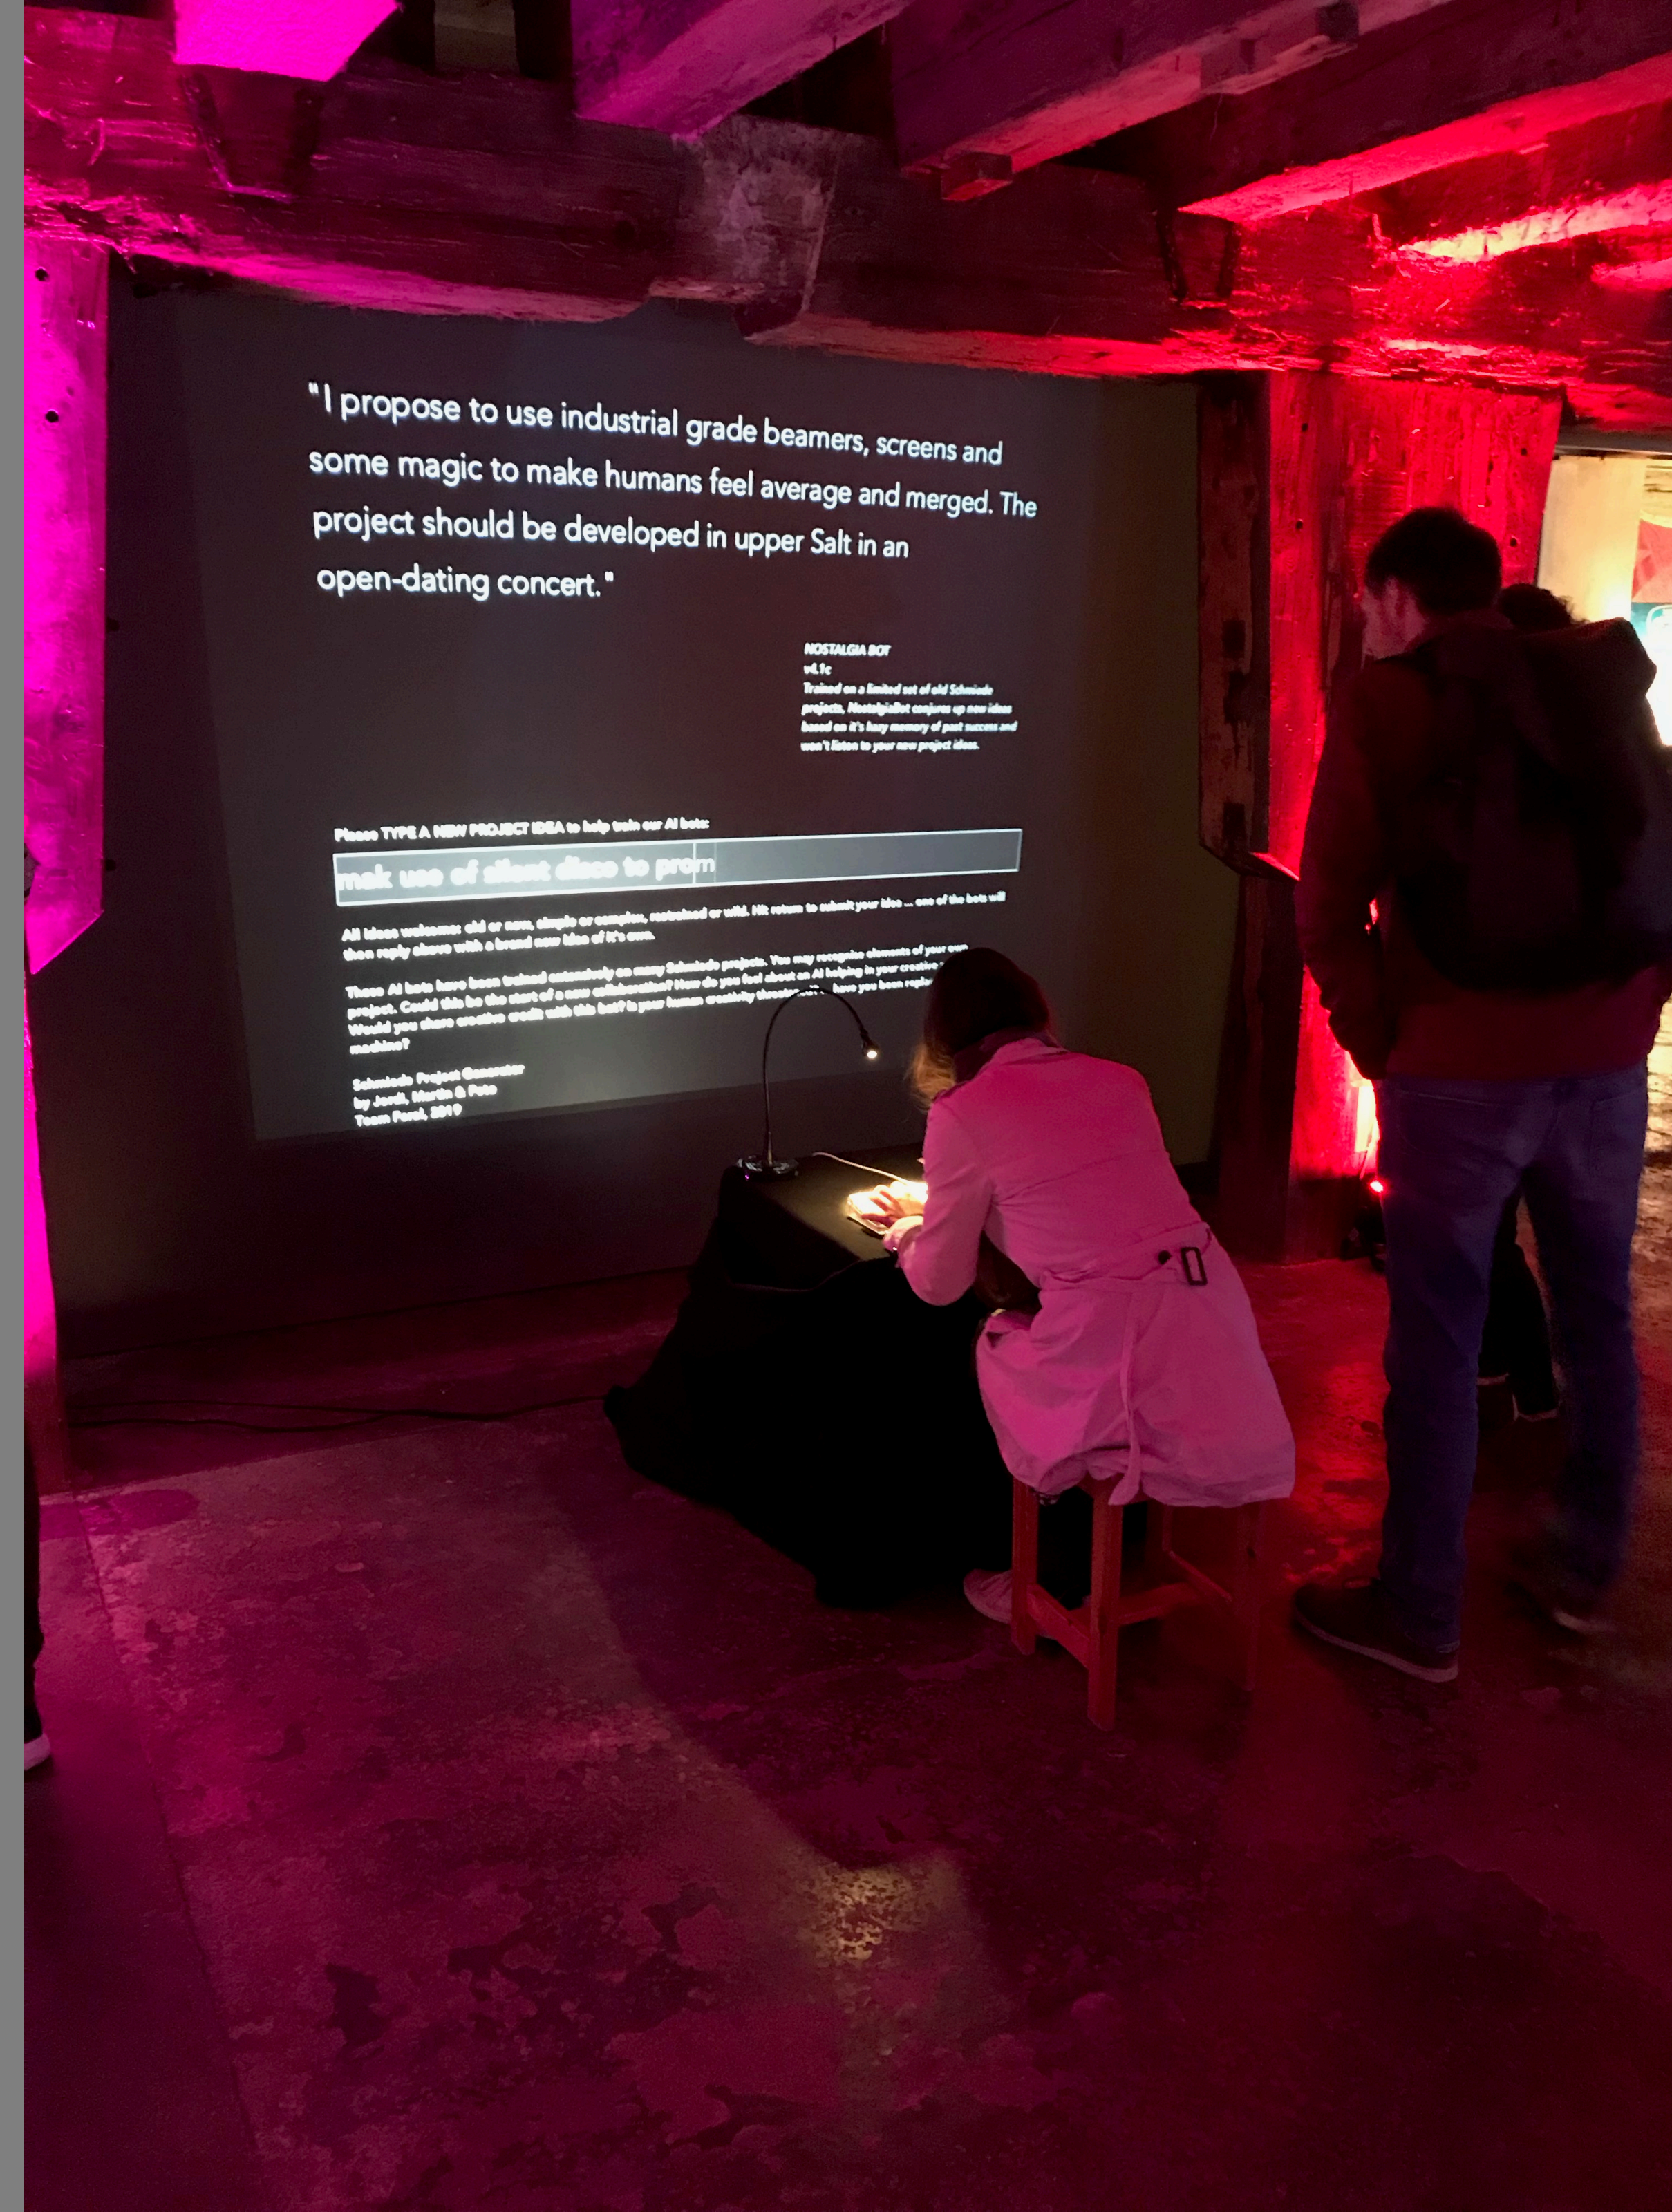

These AI bots have been trained extensively on many Schmiede projects. You may recognise elements of your own project. Could this be the start of a new collaboration? How do you feel about an AI helping in your creative practice? Would you share creative credit with this bot? Is your human creativity threatened? ... have you been replaced by the machine?

Schmiede Project Generator
by Jordi, Martin & Pete
Team Feral, 2019

but... an unexpected outcome!

what we designed for solo
interaction turned out to be
very social and performative

“ideation performance”

"A small stage filled with microphones. This is a really great idea is to make music from smashing plates. It will use mobile phones."

SMITH BOT
v0.2a

This is the most advanced bot and generator projects based on an extensive memory of past projects.

Please TYPE A NEW PROJECT IDEA to help train our AI bots:

A project which involves food

All ideas welcome: old or new, simple or complex, restrained or wild. Hit return to submit your idea ... one of the bots will then reply above with a brand new idea of it's own.

These AI bots have been trained extensively on many Schmiede projects. You may recognise elements of your own project. Could this be the start of a new collaboration? How do you feel about an AI helping in your creative process? Would you share creative credit with this bot? Is your human creativity threatened? ... have you been exploring the machine?

Schmiede Project Generator
by Jordi, Martin & Pete
Team Feral, 2019

"A firework based artwork to melt all the snow artworks."

FORGETFUL BOT

v2.3b

This bot has a short term memory (probably from drinking too many G1 beers) and only remembers the last few ideas.

Please TYPE A NEW PROJECT IDEA to help train our AI bots

200 rats to

All ideas welcome: old or new, simple or complex, rationalized or wild. Just type your idea and then reply above with a brief one line of it's own.

These AI bots have been trained exclusively on many thousands of projects. Could this be the start of a new art form? How do you fit? Would you share creative credit with this bot to give human credit machine?

Schmidt Project Generator
by Jord, Maria & Pete
Team Pencil, 2019

with your idea

machine elements:
AI helping in your art:
... have you been rep

questions raised

can training machine learning be a performance in itself?

can machine learning tools be an equal creative partner?

does machine learning have to be 'intelligent' to foster creativity?

Oblique Strategies - Brian Eno & Peter Schmidt (1975)

ways to possibly use the system, but
please improvise your own!

improvCues

Can machine learning stimulate creativity in improvised performance? How could machine learning fit in to your own musical practice?

Start by following the three prompts on the right using the available instruments. Discuss the prompts with your fellow players. Do they spark new creative ways of playing?

Find the
glockenspiel and
pluck it.

INSTRUMENT:
Actions with instruments.

The sound of a
falling leaf.

SOUND:
Scenes, imagery and
sounds to recreate.

Solo: Start of a
solo for the cued
player(s). No one
else plays.

GAME:
Rules, games, tasks,
challenges.

Feeling inspired? Add a card to the deck!

As a trade for your idea, improvCues will generate two brand new cards using machine learning.

(1) Press [TAB] to choose which blank card you are writing on.

(2) Press [RETURN] to submit a new card to the deck.

(3) Stuck for ideas? Press [ESCAPE] to shuffle deck and draw three existing cards.

creative loop between composer,
players and machine learning

design decisions

trade - you don't get new cards for free

ambiguity - no set way to play

game cards - let the system also create new rules
on how to use itself

future work

different machine learning per card (e.g. letter level text)

open environment - not fixed to three card layout

physical prompts - use a robot to draw onto cards (tangibility)

improvCues

please come along and have a play!
